science, not fiction

8 steps guide

Register

Pass KYC

Buy TCR

Get Token

Operate the Token

Follow project

Exchange token

To the Moon!

Register

01

Just create an account at
app.tecra.space/registration

Pass KYC

02

Once you have registered on the platform, we recommend passing the KYC verification. A verified account allows the user to enjoy the full privileges and purchase TecraCoin for USD, EUR and PLN.

The KYC process is very simple and it only requires a few minutes of your time. Just in case, we have prepared a short instruction to help you pass it quickly and correctly.

Buy TCR

03

TecraCoin is the dedicated means of payment on our crowdfunding platform. The value of the currency is correlated with the success of the projects on the platform, so it is expected to rise with time - along with the number of successfully finished fundraising campaigns.

TCR can be purchased directly via app.tecra.space account for ETH (without additional verification) or for fiat money - more specifically USD, EUR or PLN (after passing KYC). Alternatively, it can be obtained for USDT on Hotbit exchange.

Don't wait - get your TCR and support the projects on the crowdfunding platform!

04

Get the Token

Once the fundraising campaigns are up and running on our platform you will be able to purchase project tokens to support the creators in the project realization process. The tokens are obtained with the use of TecraCoins, which are the sole means of payment on the crowdfunding platform.

Soon, you will be able to purchase project tokens and store them on your account.

Operate the Token

05

Project creators are obliged to repurchase the tokens from the market [after their project is successful]. However, it is investors that set the price of the token. The best tactic is to hold on to your tokens until the final stages of the project development, and then profit along with the project creators once the product is ready for the commercialization phase.

Follow your project

06

You will be able to monitor the progress of the projects you chose to support. The investors oversee whether the projects are meeting previously set milestones. The funds for project realization are released in tranches, and the payments can be halted if project creators are not fulfilling their promises.

07

Exchange the token

It will be possible to trade the tokens on our dedicated decentralised exchange - Tecra DEX. The exchange is currently in the development stage but we are making steady progress. It will not be long until our users will be able to use it for trading tokens and cryptocurrencies.

To the moon!

Our journey ends with a successful investment and development of new technologies. If you want to be a part of it, visit app.tecra.space
