Investment certificate details:

Each investor will receive an investment certificate corresponding to the chosen package (Invest. Cert. Bronze, Invest. Cert. silver, etc.). These certificates will be distributed as **NFTs**, granting various **lifetime benefits to investors**, such as a specific status on our different social networks, access to a private chat with the team, and voting power in the DAO.

In essence, **investment certificates serve as a recognition of the financial support** provided to the project. They aim to strengthen investor involvement in the community and encourage them to continue actively participating in its development.

Here is the list of '**NFT investment certificates**' that can be obtained:

- Invest cert. **Bronze**: Statut Bronze investor on Discord and Telegram + channel investor access with the team
- Invest cert. **Silver**: Statut Silver investor on Discord and Telegram + channel investor access with the team + Silver vote Power on DAO
- Invest cert. **Gold**: Statut Gold investor on Discord and Telegram + channel investor access with the team + Gold vote Power on DAO
- Invest cert. **Platinum**: Statut Platinum investor on Discord and Telegram + channel investor access with the team + Platinum vote Power on DAO
- Invest cert. **Diamond**: Statut Diamond investor on Discord and Telegram + channel investor access with the team + Diamond vote Power on DAO
- Invest cert. **Master**: Statut Master investor on Discord and Telegram + channel investor access with the team + Master vote Power on DAO
- Invest cert. **Top 15**: Statut Top 15 investors on Discord and Telegram + channel investor access with the team + Top 25 vote Power on DAO

Top 15 NFT drop Privileges:

The top 15 investors will be rewarded with a valuable NFT. They will have the privilege, each in turn (from the largest investor to the 15th), to choose an NFT from the following categories:

- **Top 10 NFTs from the "LANDAO" collection** (sorted by the voting power they confer)
- **5 NFTs not for sale from the "Lost World" collection**

This system guarantees exclusive access to rare and coveted NFTs to the most committed investors.

(Obtaining the Top 15 NFT Drop Privileges do not disqualify you from the lottery*)

NFT Lottery (If the mid-cap of our crowdfunding campaign is reached):

At the end of the crowdfunding campaign, a lottery will be held for all participants.

Winners will be drawn randomly and will receive a random reward from the following:

- **17 LANDID NFT minting rights:** Help preserve human heritage.
- **5 unreleased LANDID NFTs:** Exclusive NFTs not found anywhere else.
- **40 LANDAO NFT minting rights:** Access NFTs that grant increased voting and governance rights in the project.
- **1 unreleased Lost World NFT:** An NFT of exceptional rarity.
- **1 custom LANDID NFT minting right:** Create a unique NFT in your image.

To participate in the lottery, participants must have reached a reward pack by investing in crowdfunding. The number of lottery tickets received depends on the pack chosen:

- **Bronze Pack:** 1 ticket
- **Silver Pack:** 2 tickets
- **Gold Pack:** 4 tickets
- **Platinum Pack:** 6 tickets
- **Diamond Pack:** 8 tickets
- **Master Pack:** 10 tickets

The more you invest, the more chances you have to win!

Please see the documentation for more details on the reward packs and the chances of winning.

Holofans:

What is an Holofan?

An Holofan is a high-tech fan that uses LEDs and rapidly rotating blades to project captivating images that appear to float in mid-air. It is an innovative technology that offers a unique and immersive visual experience.

Reward:

The Master Pack and higher tiers of our crowdfunding campaign include an exceptional reward: an Holofan pre-loaded with the files needed to project all the "Lost World" NFTs from Etherland in 3D.

Reward Content:

- One Holofan
- Access to the Etherland "Lost World" collection in 3D
- Pre-loaded files to project all "Lost World" NFTs

Why Offer an Holofan?

Offering an Holofan as a reward presents several advantages:

- **Unique Experience:** This reward offers backers a unique and immersive experience they will not find anywhere else.
- **Added Value:** The Holofan allows backers to fully enjoy the "Lost World" collection in 3D, providing them with a new dimension of exploration and appreciation.
- **Exclusivity:** This reward is limited to Master Pack and higher tier backers, making it even more exclusive and desirable.
- **Collection Promotion:** Offering an Holofan helps to raise awareness of the Etherland "Lost World" collection to a wider audience and generate interest in the project.

Merch/NFT:

We will launch an exclusive clothing collection (sweatshirts and t-shirts) featuring the Etherland logo.

Each item will be linked to a unique NFT accessible via an integrated QR code.

The NFTs will be stored on the Ethereum blockchain.

There will be two ways to obtain an NFT garment:

- Invest in the crowdfunding campaign and reach a certain investment level to receive an NFT garment as a reward.
- Purchase an NFT garment directly on the dedicated marketplace during the crowdfunding campaign.

Collection features:

- **Unique collectibles:** Each NFT will be numbered and will certify the garment's authenticity.
- **Exclusivity:** The collection will only be available during the crowdfunding period.

Collection goals:

- **Symbol of belonging:** The NFT garments will symbolize support for the project and commitment to the Etherland community.
- **Project funding:** The funds raised from the sale of the NFT garments will contribute to Etherland's crowdfunding.

Additional information:

- **Limited quantities:** The garments will be available only during our crowdfunding.
- **Dedicated marketplace:** A marketplace accessible via the Etherland website will allow for the purchase and sale of NFT garments.

Minting Credits:

This reward will be unlocked once the "midcap" is reached.

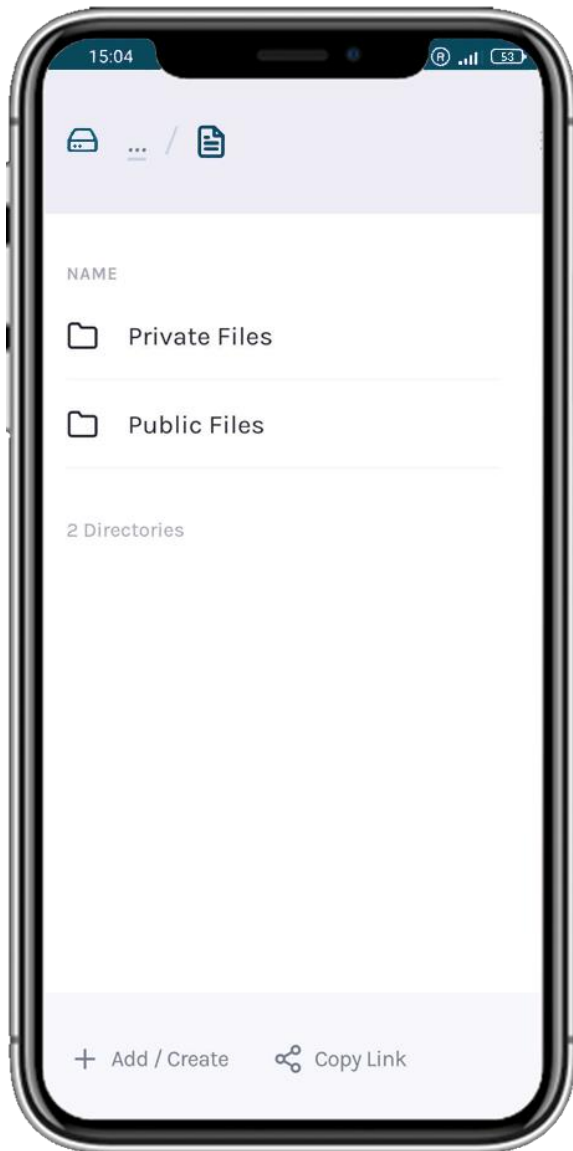

Minting credits are tokens that will enable users to create staking NFTs.

Here is the detail:

- Each wallet address initially receives a total of 3 minting credits.
- To unlock the use of one of these minting credits, the user must accumulate \$1000 worth of staking rewards. Once this milestone is reached, the user can exchange their \$1000 for the use of a minting credit to create an NFT.
- Crowdfunding investors who reach a certain level of investment receive bonus minting credits, giving them a higher initial number of credits for their wallets.
- Although the initial total of minting credits for NFTs is standardized for all wallets, except those receiving a bonus in crowdfunding, the supply of credits is not limited. Etherland may distribute additional minting credits during special events or through commercial partnerships in the future.

25GB REFS Lifetime Account:

The Real-Estate File System (REFS) is one of our B2B-centric products. It enables users to easily access and manage property-related documents on a daily basis.

Its optimized conception allows for a combination of Quantum-proof encryption, password-less access, and utmost control over file sharing, all in an extremely intuitive and simple manner.

Even if the first public access will be limited to real estate professionals, we thought it wise to reward our most dedicated crowdfunding participants with access to the earliest stages of what is set to be a revolution in personal cloud data storage.

As such, you will be able to enjoy 25Go of ultra-secure and easy-to-use personal storage, and for as long as electricity is generated somewhere on Earth.

Goodies:

Gear up with the Etherland Goodies Bag! This exclusive reward includes a premium lighter, and pen emblazoned with the Etherland logo – practical tools with a touch of blockchain style.
